

Mayor Cull, Sir please be
on notice that the
Corruption & mismanagement
of the Dunedin suburb
of Aramoona through
the old boys
IE freemason & catholic
Criminals
needs to be called to
account. Every time
there is big rain,
Aramoona is awash
with sewerage! Being
as the Pope has the
Guts to stand up
against organized crime!
would you please
consider. In a rush
to get the "form"
of the Dunedin
Citizens, the mason's
through Mayor Turner
rushed them

freeholding with out
any intelligent
appraisal of what
is essentially swamps
to cover their greedy
corruption, yous have
set about environmental
vandalism. On the highest
flood free part of
Arrompanso, yous have
dug a massive
ditch to fill with
sewerage. We the
people have no idea
of what is going
down. we were never
consulted, least ways
common sense is brought
in the sad affair.
The ditch appears
to lead down to
the head tank of a
huge under ground
water fill that

real fast when once
in a blue moon
they are graded.
All & all enquiries
or requests for service
they give a wee
giggle & say "it's
not us you should
ask, but them. This
day I received a
pamphlet "Second
Generation Plan"! My
fear is it'll be
the "same, old, same
Old" crap
that has been
undemocratically
shoved down our
throats for years.
In this meeting
we'll sit looking
at the "family"
smiling away! Knowing
at the end of

sits under Aramoana
"Golden Triangle"
of land, with some
bizzare misunderstanding
that its a drain!
The way the masons
set up the freeholding
was with 13 separate
authorities

Dunedin City Council
Otago regional Council
& that Dept of Conservation
Now through sectarianism
IE Spiritual Pedaphiles
you could never get a
straight answer on
anything. Being as the
Dunedin Rate Payers
on high days & holidays
stream down to
Aramoans bumper to
bumper. The dirt
roads are shagged

the meeting they'll
sit with no mandate,
sit & decide behind
closed doors, what
the cheapest, short
term option is. Up
in Napier there is
an outer suburb
known as Haumoana,
same situation as
Aramoana. What they
done there was
"Common Sense"
Combined with Money.
They put in drainage,
curb & channeled &
then at the lowest
point, a massive
great "Bulge Pump"

End of Problem.

Yours Sincerely + Gladly
Allen Clark
